<u>Clean Air Everywhere – in Reading!</u> <u>Petition to Reading Borough Council</u>

To Reading Borough Council: "I call for a new air quality action plan to be put in place by 2018 with the necessary resources to cut all pollutant levels to below World Health Organisation guidelines by 2020."

The Government says Reading is 'not required to conduct a feasibility study' to improve air quality although modelling predicts that Reading will barely meet the annual legal limit for NO2 by 2020. This is not good enough – measures are needed to reduce traffic emissions as Reading continues to grow. Even if the modelling is correct the legal limit for NO2 is not a 'safe' threshold and there are other pollutants such as micro-particles PM2.5 which are not routinely monitored in central Reading.
